

How RailRestro is Changing the Future of Train Travel Food Services

Making Food on Train and Order Food in Train Services Seamless and Modern

For a long time, the idea of **food in train** within India was restricted to cars or vendors at the station with limited choices and a poor quality. However, today, RailRestro is transforming this experience by giving passengers the ability to **take orders for food and drinks in trains** in just a few clicks.

RailRestro isn't just enhancing the way passengers eat on the train, it's creating the future of food service on trains through innovation, efficiency and a variety of tasty choices.

The Old The New. New Food on Train Experience

Traditional Train Food:

- There are a few choices
- Average quality
- Unreliable hygiene
- There is no customization
- Long wait times

RailRestro Food Service:

- Restaurant-style meals
- Many options for food
- Food that is safe, FSSAI-certified and hygienic
- Simple customization and special diets
- Fast, contactless delivery right on your own.

RailRestro has revolutionized the way people **take [order food on trains](#)** and has made it safer and faster as well as more satisfying.

Key Innovations RailRestro Brings to Food on Train

1. Online Train Food Ordering

RailRestro has introduced an online system that is seamless and lets passengers **order food on trains** by using:

- PNR number
- Station name or train number
- RailRestro website or mobile app

This simple procedure allows you to browse menus, make orders and track deliveries in real-time.

2. Wide Restaurant Network Across India

RailRestro is a partner with hundreds of the best restaurants located near stations on trains, providing a variety of **food on train** options, such as:

- North Indian, South Indian, Chinese
- Pizzas, Biryani, sandwiches and even snacks
- Jain food and child-friendly dishes

This coverage is extensive and ensures that wherever you go, you will be able to quickly **get food on the trains** from trustworthy sources.

3. Real-Time Train Tracking

RailRestro's technology monitors the train's location in real time to ensure that food is freshly prepared and is delivered at the station you choose regardless of delays.

4. Contactless Delivery

The platform has introduced secure and convenient delivery options, which are contactless improving hygiene and comfort for today's travellers.

RailRestro's Impact on the Future of Train Travel

RailRestro is a driving force behind forward the direction of **food delivery by train** across India by paying attention to:

- **The customer's convenience** Simple ordering process, numerous options, and real-time tracking
- **Safety and quality:** Hygienic kitchens, FSSAI-approved partners

- **Menus that can be customized** catering to your dietary needs such as Jain food, food with less spice, and children's meals
 - **Affordable:** Competitive prices with discount offers and combos
- A growing number of passengers prefer to **take food orders in the trains** through RailRestro instead of using traditional pantry meals.

Why RailRestro is the Future of Food on Train
